

VAIBHAV ACHUTHANANDA

Palo Alto, CA | 123-456-7890 | email@domain.edu | whybhav.in | linkedin.com/in/whybhav | github.com/codebhav

SUMMARY

Master of Science in Computer Science candidate with strong technical aptitude and a collaborative mindset. Experienced in full-stack development, system administration, and artificial intelligence applications. Effective communicator with problem-solving abilities and attention to detail. Adaptable team player passionate about leveraging technology to create innovative solutions for real-world challenges.

EDUCATION

Stevens Institute of Technology <i>Master of Science in Computer Science</i> <ul style="list-style-type: none">Relevant Coursework: Deep Learning, System Administration, Advanced Algorithms, Web Programming	Expected: May 2026 GPA: 4.0
Lovely Professional University <i>Bachelor of Technology in Computer Science and Engineering</i>	Jun 2023 GPA: 3.3

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, Swift, Go
Front-End: React, Next.js, Svelte, SvelteKit, Tailwind CSS, Three.js, Redux
Back-End: Node.js, Express, REST APIs, GraphQL, Microservices
Data & ML: TensorFlow, PyTorch, scikit-learn, Keras, NumPy, Pandas, CNN, SVD
Databases: MongoDB, MySQL, PostgreSQL, Firebase, Redis
DevOps & Tools: Docker, Git, CI/CD, AWS, Google Cloud, Linux, Bash

PROFESSIONAL EXPERIENCE

Mohit Mokai Mediation <i>Software Engineering Consultant</i> <ul style="list-style-type: none">Architected and implemented a scalable web application using React, Next.js, and Tailwind CSS that handled 15K+ concurrent users, reducing page load time by 75% and increasing conversion rate by 40%Designed a microservices-based API architecture with Node.js, implementing automated testing with Jest that increased code coverage to 92% and reduced deployment bugs by 80%Engineered a content management system leveraging the Blogger API, Firebase, and custom webhooks that automated updates and increased content freshness metrics by 65%	Jan 2024 – Aug 2024 Bengaluru, India
BSides Indore <i>Technical Product Consultant</i> <ul style="list-style-type: none">Led system architecture redesign initiative, conducting performance profiling and requirement analysis that identified 7 critical bottlenecks and improved overall throughput by 200%Implemented advanced UX testing methodology across 30+ user stories, detecting 15 critical accessibility issues while achieving WCAG AA compliance and reducing user error rates by 36%Created and managed an agile development framework with 4-day sprint cycles that maintained 100% on-time delivery across 20+ feature releases while reducing development iterations by 65%	Jun 2023 – Jul 2023 Indore, India

TECHNICAL PROJECTS

Computer Vision Emotion Recognition System <ul style="list-style-type: none">Created a real-time computer vision system using Python and TensorFlow that detects and classifies 7 distinct human emotions with 93% accuracy using a custom-trained CNN architecture with 5 convolutional layersEngineered 3D facial representation using Swift with ARKit and ARSCNFaceGeometry to generate 52 facial anchor points, enabling precise emotion tracking even in low-light conditionsOptimized TensorFlow model for mobile deployment by reducing inference time to under 50ms and memory usage by 75% while maintaining recognition accuracy within 3% of server-based model	Sep 2023 – Dec 2023
--	---------------------

AWARDS & LEADERSHIP

- Published research in the proceedings of the 7th International Joint Conference on Computing Sciences (ICCS-2023)
- Top 6 finalist in the All India Capture The Flag (CTF) competition organized by BIT Mesra with over 200 participants
- Operations Lead at Google Developer Student Clubs, mentored 30+ student developers and organized 12 workshops
- University representative at the North Zone Inter-University Chess Championship, reaching quarterfinals
